

**Residential & Civil  
Construction Alliance  
of Ontario**  
Constructing Ontario's Future

MEDIA ADVISORY

## **NEW REPORT WILL OUTLINE RISK OF UNDERFUNDING INFRASTRUCTURE**

---

**WHAT:** Next Thursday, the Residential and Civil Construction Alliance of Ontario (RCCAO) will release a report, illustrating an “optimal infrastructure investment scenario” based on an analysis of different capital investment and maintenance scenarios over the next 50 years.

RiskAnalytica (a Toronto-based risk analysis group) wrote this independent report, which highlights how the quality and quantity of Canada’s infrastructure has a direct impact on the robustness and resilience of Canada’s economy, future growth and productivity.

**WHY:** Recent power outages in the GTA are a reflection of an aging hydro infrastructure but are indicative of an infrastructure deficit across the board.

This report will link public spending on infrastructure to national growth and prosperity, and quantify what Canada’s infrastructure strategies might cost individuals and businesses to the year 2060.

**WHO:** **Andy Manahan** – Executive Director – RCCAO  
**Paul Smetanin** – President and CEO – RiskAnalytica

**WHEN:** Availability for interviews:  
Thursday, July 15, 2010 – 11:30 a.m. – 4:00 p.m.

-30-
