## Bridging the Gap

*We are pleased to report that RCCAO has commissioned a study that will investigate the state of Ontario's bridge structures. The study will be led by Bob Nairn, Transportation Director for Marshall Macklin Monaghan. In addition to reviewing existing data on the condition of bridge structures, Mr. Nairn will contact selected municipalities through direct interviews and a survey questionnaire to compile additional data that is not yet readily available.*

*The report will be released later this summer.*
