

Toronto - June 19, 2007

*RCCAO is pleased to welcome new member, the Ontario Concrete & Drain Contractors Association. The short description of the association below was supplied by OCDCA's Executive Director Robert Celsi.*

*The Ontario Concrete & Drain Contractors Association is an Accredited Association which protects, promotes and strives for progress in the interests of its 30 current Active Contractor Members and 13 Independents who perform work in the Concrete and Drain sector of the construction industry. OCDCA members employ a workforce of between 900 and 1,000 persons.*

*OCDCA is committed to the promotion of safe work environments and public safety in general by the proper installation of drainage systems from the main to the inside of the structures and all work incidental thereto. As well, we are responsible for various concrete work throughout the structures which must be professionally placed and we strive to surpass performance standards ensuring the end user or home owner enjoy the end result of the work performed by the OCDCA contractor!*

*Many of our Members are proud of the companies which in some cases were formed by their fathers, dating a far back as the 1950's when they received official Drain Layer Badges. This rich history continues today and is evident in the involvement and genuine concern all our Members display within our Association.*

*We are proud of our history and we are proud of our sector and especially, as our motto states, we are "Committed to Progress"!*
