**I confirm that:**

1. The MMP contains all information required.
2. The risk assessment evaluation assesses human health and environmental risk in relation to the proposed uses of excess soils and materials in the MMP.
3. Local authorities and relevant environmental regulatory bodies take no exception to proposed development/remediation. This on the basis that the use of any excavated excess construction soils and materials is not likely to cause any harm to human health or cause an adverse impact to the natural environment.

This Declaration has been made for the purposes of this BMP for Handling Excess Construction Soils in Ontario (Version 1) and will be submitted to required local and provincial regulatory bodies as required.

You are advised that if excess construction soils and materials are (1) not used in accordance with the MMP or risk assessment evaluation, (2) not suitable for reuse, (3) used in excessive amounts, or (4) used in such a manner as to harm human health or cause an adverse effect to the environment, the local regulatory bodies involved may conclude that those excess construction soils and materials are deemed a waste material.

You are also reminded that a Verification Report must be prepared upon completion of work as set out in the Remediation Strategy/Design Statement covering the site and that this Verification Report must be provided to the regulatory agency having jurisdiction upon request.
